Dear Prof. Rai,

With this letter I would like to invite you to work with my group at the University of Wuppertal as a Research Associate for the period of six months, hopefully starting on September 1, 2001 or as soon thereafter as possible (until February 28, 2002). The brutto salary for your position is approximately DM 2.500 in accordance with BAT/IIa regulations. From this amount you will be required to pay for your own health insurance. I am sorry that I am not able to reimburse your travel expenses for the proposed trip but hopefully you will be able to obtain support for this purpose from other source. This position may be extended for a longer period upon mutual agreement.

Please use this letter of invitation to secure a visa from the German Consulate in India. Let me know if there is anything else we can do to expedite your preparations for the proposed visit. I will look forward to your hopefully positive reply in due course.

Sincerely yours,

Sd/-

Robert J. Buenker.

Sub: Study Leave in respect of Dr. S.N. Rai, Director of  
Computer Centre.

Dear Madam,

I have gone through the invitation to Dr. S.N. Rai from the University of Wappertal (Germany) and Dr. Rai's proposed research work during the Study Leave (Copy enclosed). In my view the work to be undertaken by Dr. Rai during the Study Leave will attribute to the qualitative improvement of the Computer Centre/ University and it has a close connection with the sphere of his duty.

I, therefore, recommend that Study Leave be granted to him for a period of six months.

Thanking You,

Yours sincerely,

Brief outline of the work proposed to be done at the University of Wuppertal, Germany during the study leave (Sept. 2001 - Feb. 2002).

I have been associated with the theoretical chemistry group at the University of Wuppertal since 1988 while I was on my first study Leave from this University. We work on various computational techniques involved in studying different molecular systems. Since my last visit to Wuppertal in 1995, much advancements have been made in this field. During my plan visit, I propose to update my expertise in the study of heavy atom diatomic molecules using recent computational methods. Also I proposed to get involved with newer computer softwares for various computer applications.
